FIFTY-THIRD ANNUAL REPORT
OF
THE DIRECTORS
OF THE
GLASGOW ROYAL ASYLUM
For Lunatics,

SUBMITTED, IN TERMS OF THEIR CHARTER,
TO
GENERAL MEETING OF CONTRIBUTORS,

10TH JANUARY, 1867.

GLASGOW:
PRINTED BY JAMES HEDDERWICK & SON,
PRINTERS TO THE QUEEN.
1867.

FIFTY-THIRD ANNUAL MEETING.

The ANNUAL GENERAL MEETING of QUALIFIED CONTRIBUTORS to the GLASGOW ROYAL ASYLUM for LUNATICS, was held within the Religious Institution Rooms, on THURSDAY, 10th January, 1867,

COUNCILLOR JAMES BROWN IN THE CHAIR.

The SECRETARY having read the advertisement calling the Meeting, with the Regulations bearing upon it, produced on behalf of the Directors of last year, and read a Report of their procedure, and of the general state and management of the Institution during that period,

The CHAIRMAN said the Report on the whole was satisfactory. The only part that was not so, was the portion which referred to the financial department. He concluded by moving, "That the Report now read be approved of and adopted, as the Fifty-Third Annual Report of the Directors; and that a sufficient number of copies be printed for circulation, as formerly, among the Qualified Contributors, Privileged Parishes, Friends of Patients, and others interested in the Asylum."

Dr. PAGAN, in seconding the motion, said that he believed the reason why the Asylum obtained so few legacies and subscriptions, was, that the Institution was generally supposed to be self-supporting. This he begged to say was a great mistake. The Directors in many cases reduced the rate of board considerably, and gave Patients who had been in good circumstances at one time, better accommodation than what their friends were able to pay for. He wished them to recollect that those in the lowest class in the Asylum were in a very different condition from ordinary paupers, and he could not conceive a more charitable object for people to subscribe to, than that of enabling the Directors to place those inmates who had seen better days in a more comfortable position than their friends could afford.

The Rev. JAMES M'GREGOR, of the Tron Church, said that not merely did the public seem to think that the Institution was self-supporting, but they appeared to consider that it was very wealthy. He had little doubt that if they were better informed on the subject, both legacies and contributions would pour into its funds. It was strange that only two guineas should have been received as subscriptions during the whole of last year.

The motion was then agreed to.

Dr. FRANCIS H. THOMSON moved that the thanks of the Meeting be given to the Directors of last year, and especially to those who were Members of the Weekly Committee, for the zeal and diligence with which they had discharged their respective duties.

JOHN M'GAVIN, Esq., having seconded the motion, it was carried unanimously.

The Rev. Mr. M'GREGOR, in moving that the thanks of the Meeting be also tendered to Dr. MACKINTOSH and his Medical Assistants, and to the other Officials at Gartnavel, for their efficient discharge of the delicate and onerous duties of the different offices intrusted to them, said that when one reflected on the number and variety of qualifications requisite in the Medical-Superintendent of an Institution so large as this, it must be a matter of great thankfulness to the Directors and the public at large, that the Asylum has been presided over, for so many years, by so admirable a Superintendent as Dr. MACKINTOSH.

Dr. LEECH seconded the motion, and expressed the hope that Dr. MACKINTOSH would be long spared to attend to the affairs of the Institution as he had hitherto done.

The motion was cordially agreed to.

The SECRETARY then read the names of the gentlemen returned as Directors by various Public Bodies. (See page 5.) It was next necessary, he said, to elect Eight Directors from among the Contributors. All the gentlemen who at present retired were eligible for re-election.

Voting papers having been handed round and returned, it appeared that the following gentlemen were re-elected as Directors, namely, Messrs. WM. WEST WATSON, WILLIAM M'LEAN, JOHN SMITH, JOHN BROWN, Jun., GEORGE THOMSON, JOHN CAIRNS, ROBERT AITKEN, and Dr. JOHN M. PAGAN.

On the motion of WILLIAM BROWN, Esq., a unanimous vote of thanks was tendered to the Chairman, which closed the proceedings.

LIST OF DIRECTORS, &c.

FOR 1867.

THE LORD PROVOST, PRESIDENT, *ex-officio*.

Mr. JAMES BROWN,	}	from Town Council.
" WILLIAM ALLAN,		
" JOHN ROXBURGH,	}	from Merchants' House.
" JAMES KING,		
" ANTHONY INGLIS,	}	from Trades' House.

The CHIEF MAGISTRATE of Paisley,	}	<i>ex-officiis.</i>
Dr. ALLEN THOMSON, Professor of Anatomy,		
" W. T. GAIRDNER, Professor of Medicine,		
" ALEXANDER MACKINTOSH, Physician to the Asylum,		

Weekly Committee.

Mr. JOHN BROWN, Jun.	Mr. JOHN CAIRNS.	Mr. JOHN ROXBURGH.
" GEORGE THOMSON.	" JAMES KING.	" JAMES BROWN.

Visitors.

Mr. WILLIAM ALLAN.	Dr. W. T. GAIRDNER.
" ANTHONY INGLIS.	Rev. Dr. PATON.
" JAMES SIMPSON.	Mr. THOMAS KYLE.
Dr. A. D. ANDERSON.	" ROBERT AITKEN.
" WILLIAM LYON.	" ALEXANDER RONALDSON.
" JOHN M. PAGAN.	" THOMAS HILL.
" ALLEN THOMSON.	

OFFICERS OF THE ASYLUM.

RESIDENT.

Physician - Superintendent.

ALEXANDER MACKINTOSH, M. D.

Medical Assistants.

JOHN HAY, M. D. AND ROBERT BLAIR, M. D.

Superintendent of Ladies and Matron.

MRS. ISABELLA STEVENSON.

Steward.

MR. JOHN CALDWELL.

Master of Works.

MR. DAVID WATSON.

Gardener and Farm - Overseer.

MR. JAMES DUTHIE.

NON-RESIDENT.

Surgeon.

JOHN G. FLEMING, M. D.

Treasurer and Secretary.

MOSES PROVAN, C. A.

Chaplain.

REV. JOHN ROBERTSON.

Auditor.

JOHN E. WATSON, C. A.

FIFTY-THIRD ANNUAL REPORT

OF

THE DIRECTORS

OF THE

Glasgow Royal Asylum for Lunatics.

THE DIRECTORS, in the following statements, submit to their Constituents and the Public an account of their transactions for the past year:—

The general results relative to the Patients are exhibited in the subjoined Return:—

	<i>Males.</i>		<i>Females.</i>		<i>Total.</i>
There Remained in the Asylum on 31st					
December 1865,.....	261	...	241	...	502

	==		==		==
Average daily numbers,.....	262	..	253	...	515
	==		==		==

From the preceding table it will be seen that 842 Patients have been treated during the year. The number admitted, including voluntary Patients, was 339, or 101 more than in the preceding year. 31 Patients of different classes were refused admission from want of room. The ages of those admitted ranged from 16 to 84; one very frail female, indeed, was stated to be considerably older. The duration of the malady before entry varied from a few days to 40 years. The great majority were feeble and reduced in condition; a few were moribund, or nearly so, when received—dying on the following day, or shortly afterwards; whilst many were almost in a nude state, degenerated in their habits, destructive, suicidal, or dangerous to others. Including congenital cases, nearly 200 were incurable—the malady being frequently complicated with paralysis, epilepsy, or other serious disease.

It is generally very difficult, and often impossible, to arrive at the true cause of the mental disorder. In the case of one female, however, there was no difficulty. The family whom she had faithfully served for the long period of forty years was broken up, the survivor of it kindly and considerately providing for her; but, notwithstanding, her grief was so great that she became insane, and was obliged to be sent to the Asylum.

One of the female Patients admitted into the West House laboured under epilepsy. It is many years since an epileptic was admitted into this division, although such an occurrence is not at all uncommon in the East House.

The highest number of Patients on any one day during the year 1866 was 542. The dismissals were very numerous, amounting to 256.

The pressure for accommodation was greatest in the East House. In order to make room for a large accession of Lanarkshire Patients, a corresponding number, belonging to Bute and other counties, had to be dismissed in autumn. Many of the latter had resided for years at Gartnavel, and were much disinclined to leave it. There were painful scenes at parting, but all were got safely away.

Several Patients not considered dangerous—one of them after a residence of 17 years—were taken home to be tended by their relatives; and a few were boarded in the country, several miles from Glasgow—the remainder were sent to other asylums.

The Cures were 124 in number. One of these—the case of a female—was rather remarkable. She had been in bad health and ill mentally many weeks before admission, and for 19 months afterwards her excitement and emaciation were extreme. In consequence of her language and conduct, her guardians could scarcely approach her at their visits, yet she recovered in mind and body. At the end of two years from the date of her admission she was discharged cured, and she has continued well ever since.

The prevalence of cholera in England and elsewhere suggested to the Directors the propriety of adopting precautionary measures, with the view, if possible, of preventing its invasion.

After everything had been done that the Officials could think of, the Directors, in the beginning of August, requested Professor GAIRDNER, the Sanitary Officer of Glasgow, to inspect the buildings and grounds, &c., and to report to them on the subject. This was carefully

done, and Dr. GAIRDNER's recommendations were immediately carried into effect.

The Directors gratefully record their thankfulness that no case of cholera has occurred within the gates, or even near to the Asylum, and that the Institution has been visited by no epidemic of any kind during the year.

The general health has been good, notwithstanding the overcrowded state of the East House, from the unusual number admitted, and the complicated diseases under which so many of them laboured. It was a source of solicitude in the case of many of the Patients lest, coming as they did from the most filthy hovels, and so much affected, they should have been the means of propagating disease amongst the others.

In addition to the alterations suggested by Dr. GAIRDNER, the Directors ordered a new wash-house and disinfecting oven to be erected. The temperature of the latter can be raised to upwards of 250 degrees Fahrenheit.

A new boiler has been provided in place of one that had become worn out; and other things have been similarly replaced where necessary. A great part of the boundary paling has been renewed, and a portion of the external grounds and gardens were drained, levelled, and trenched. The stock and land have been very productive—two tons, for example, of apples being grown in the garden.

It was mentioned in last report that a remit had been made to Mr. M'CREATH, the mining-engineer, to ascertain whether minerals existed in the grounds of the Institution. After examining the shafts in the neighbourhood, he reported that he had no doubt there were, and submitted a plan to the Directors whereby

they might be worked without injury to the buildings. The minerals were accordingly advertised, but as yet without any practical result.

In the course of last session of Parliament, the LORD-ADVOCATE introduced a Lunacy Bill, containing provisions which were considered to injuriously affect the chartered Asylums of Scotland. The Directors thought it necessary to look after this bill, and, in conjunction with those of several of these institutions, sent deputations to London to watch its progress, and to confer with members of both Houses on the subject. To the noblemen and gentlemen who, after much trouble, succeeded in getting the bill amended, the Directors beg to return their best thanks.

The Abstainers' Union lent their invaluable aid, as formerly, coming out to Gartnavel frequently with the professional ladies and gentlemen engaged by them for the City Hall Concerts. To Mr. M'NEILL and Mr. SMITH, Chairmen, to Mr. AIRLIE, Secretary, to Miss KIRK, who is a great favourite with the Patients, and to all the other artistes, the best acknowledgments of the Directors are due. They would also thank Mr. WHITE-LAW, Dr. FRANCIS H. THOMSON, and the other gentlemen of the Committee of the Institute of the Fine Arts, for granting permission to the Patients to visit their Exhibition. Nor are they less indebted to Mr. ROBSON, Mr. HAWTHORN, and Mr. LAW, professors of music, and to the large number of amateur ladies and gentlemen who accompanied them, and greatly assisted in giving musical entertainments of a high order. To Mr. GEORGE ROY, and the numerous talented friends who accompanied him, and assisted in giving two entertainments, which

were exceedingly well received, and for the free tickets for the City Hall which he presented to the Patients, and where a number of them heard him lecture with great pleasure; to Mr. BONFANTIN and Mr. TEMPLETON and their troupe, for an entertainment of a negro character, which the Patients enjoyed very much; to the gentlemen of the Phoenix Club, for an excellent concert in character, which was well received; to the gentlemen of the Histrionic Club, for a similar concert, and for recitations from Shakespeare, all which came off well; to Mr. FRAME for his recitations, for getting up musical entertainments, for his constant attendance and kind attentions; to Messrs. SHEARER, BAYLIS, and BROWN; and to all others who may have assisted in amusing the Patients, and in making their time fly swiftly away, the gratitude of the Directors is likewise due.

These entertainments give great pleasure to numbers of the Patients of all classes, many of whom seem to enjoy comic singing and acting the most; to others, the dance, which follows, is the best part of the whole.

They have had other in-door amusements and instruction, such as books and journals from four of the best libraries in Glasgow, in addition to the Asylum library; all the Glasgow newspapers, the London *Times*, London and provincial weekly and other papers and journals of a religious and moral character, which need not be particularised here. Principal FAIRBAIRN'S "Dictionary of the Bible," published this year, is highly thought of by them. Billiards, bagatelle, chess, backgammon, draughts, dominoes, and cards have each had their votaries. Picnic parties went several miles into the country; numbers near to Jordan Hill, Partick, the city, &c.; and a few Patients were at the coast during the season.

The visit of the DUKE of EDINBURGH to Glasgow produced quite a sensation amongst them, and a number were permitted to see his Royal Highness, on his route to the LORD PROVOST's house.

The Botanic Garden has been visited by a few, and also the public exhibitions in the city. Cricket and bowls have been played as formerly, and the matches with outside clubs were occasionally won by the Gartnavel Club. Many of the Patients continue to be employed in the garden and grounds and workshops, &c.

Dr. FLEMING, President of the Faculty, and Surgeon to the Asylum, has operated successfully on several Patients during the year.

The Directors cannot close their Report without thanking Mr. CARRICK, the City Architect, for the valuable professional information which he has this year, as heretofore, given to the Officials. Indeed, no one is more ready to assist the Asylum than this gentleman.

The Abstract of the Treasurer's Accounts, annexed to this Report, exhibits a statement of the financial affairs of the Institution for the past year. It will be observed that only two subscriptions, of one guinea each, have been obtained, and that no legacies have been received. Whilst there has thus been no extraordinary revenue, the expenditure has been unusually great. The rate of interest has been exceptionally high, and the increase in the price of some of the principal provisions, such as butcher meat, has been unprecedented. Wages, also, have risen, and this item would have been still larger had not the Directors postponed taking into consideration the application which was made to them for a further advance. Notwithstanding, therefore, the most

careful oversight, and the exercise of the strictest economy, the income has fallen short of the expenditure during the year by upwards of six hundred pounds.

To the Members of the Weekly Committee, and their sub-committees, on whom, from these and other circumstances, an unusual amount of labour has fallen throughout the year, a deep debt of gratitude is justly due. The Directors also desire to acknowledge the services of the House Visitors.

Finally, the Directors thank the Medical and Surgical Officers, the Treasurer and Secretary, the Superintendent of Ladies, the Matron of the East House, the Chaplain, and the other Officers of the Asylum, for their services during the past year.

ABSTRACT OF TREASURER'S ACCOUNTS, from 30th DECEMBER, 1865, to 31st DECEMBER, 1866.

Receipts.			Disbursements.		
To Board of Patients, received in 1866, ...	£18,883	14 11	By Balance due to the Treasurer, per last Account, ...	£4	19 8½

Repairing Carriage and Saddlery,	17	3	6
Law Expense,	118	2	0
Carriage of Parcels to Gartnavel,	5	0	0
Miscellaneous,	42	16	3½
	<u>£740</u>	<u>2</u>	<u>6½</u>

R E P O R T

BY

THE PHYSICIAN-SUPERINTENDENT,

TO THE DIRECTORS,

For 1866.

ON the 1st of January 1866, there were in the Asylum 502 Patients of all classes; during the year 339 were admitted, including voluntary and Fiscal's cases; 256 were dismissed; and 60 died. At the close of the year, 525 Patients remained in the Asylum. The number admitted in 1866 was 101 more; the number dismissed was 64 more, and the number of deaths was 19 more than in the previous year. The total number treated within the period embraced in this Report was 841, being 106 in excess of the previous year.

The following statement shows that the number treated in 1866, compared with 1865, was 841 to 735.

The number cured,.....124 to 112.

The number relieved,.....132 to 80.

The number of deaths,..... 60 to 41.

The average daily number,.....515 to 510.

ADMISSIONS.—Of the 339 admissions, 167, or about one-half, were affected with acute mania; 86, or 25 per

cent. with monomania and melancholia; and 86, or about one-fourth, with dementia and imbecility.

On a comparison with the year 1865, the number of cases of acute mania shows an increase of 55 in 1866; whereas, on a comparison between the years 1864 and 1865, the number of such cases was 5 fewer in the latter than in the former year. The cases of monomania and melancholia were 16 fewer in 1866 than in 1865; on the other hand, the cases of dementia (including 4 of imbecility) were 59 more in 1866 than in 1865.

CAUSES.—Of the 339 admissions, Causes were assigned for Insanity in only 147 cases (and many of these were suppositious), leaving the large number of 192 cases unaccounted for; whereas in 1865 only 84 out of 238 were reported as of unknown origin; at the same time it is necessary to repeat from year to year that the causes ascribed for the malady are generally of a description which cannot be relied on. 85 of the cases admitted were transferred from other Asylums, and no cause was stated in the Schedules of 74 of these. Some of these Patients had been confined in those Asylums for upwards of ten years. Of the 147 cases accounted for, 30 are assigned to various kinds of mental excitement, and 113 to physical causes, 11 being hereditary, 13 arising from predisposition, and 28 from intemperance, exclusive of 2 from the use of opium and stimulants.

SOCIAL CONDITION.—There were of the total 339 admissions—unmarried, 186; married, 115; and widowed, 33. According to former Reports, the unmarried were 16 in excess of married and widowed together; in the

present instance, they are in the proportion of 186 to 148. The unmarried males are considerably in excess of the unmarried females—105 to 81; the married males are more numerous than the married females—63 to 52; while of the widowed there are only 9 males to 24 females. In last year's Report the number of the widowed was 11 males to 25 females; and in that of the preceding year, 3 males to 14 females.

AGES, &c.—The Table of Ages shows that under 20 years, the females are double the number of the males; that from 25 years to 50, the males greatly exceed the number of the females—143 to 100; and from 55 years and upwards, the excess is on the side of the females—44 to 28.

In last Report the females began to exceed the number of the males at the age of 60; and in the Report for 1864, the excess commenced at 45, being ten years earlier than in the present instance.

Of the 180 males classified in the Table of Occupation, there are 34 labourers, 18 weavers, 10 miners, 7 clerks, 6 merchants, and 6 gentlemen; these being the highest numbers on the list. And of the 159 females, there are 52 housewives, 28 domestic servants, 16 sempstresses, 13 ladies, and 6 mill-workers.

The largest number of admissions took place in the second half of the year, being from July to September 104, and from October to December 104; from April to June the number was 86; and the smallest number, namely, 45, was in the first three months of the year. In 1865, the greatest number took place in the first quarter; the least in the autumn quarter. Of the total

number admitted, 83 were said to be suicidal—many extremely so; 88 uncleanly; and 60 destructive; while not fewer than 158 were dangerous to others. One male Patient, a shoemaker, wounded his abdomen severely with his knife. He did well. Whisky was the cause of his insanity. Another having thrown himself out of a high window, injured his right foot and leg, several of the bones being broken and displaced. In this state he was admitted. He left recovered. On admission, a female was found to be minus the right hand and the middle finger of the left; and in consequence of injuries to his legs, a male had to use crutches. One was blind; two had curvature of the spine; and one had part of his wrists destroyed by restraint. One female had both knee-joints contracted, and had been bed-ridden in another Asylum for years. Her legs have been got straight since, under the treatment of the Surgeon, Dr. FLEMING, and she is now able to sit up, to use them a little, and sew with the other Patients. One lady travelled upwards of forty miles to become an inmate, demanding admission as a voluntary Patient, unattended, and without authority. It is right to add, however, that she had been a Patient in Gartnavel many years before. The only thing that troubles her at present, is the fear of being removed from the Asylum by her relations.

One of the admissions, after a four months' residence in the Asylum, gave birth to a full-grown male child. Both did well, and the mother became more tranquil afterwards.

DISMISSALS.—The number of Patients dismissed cured was 124, being 12 more than in 1865; but including 132 relieved, the total dismissals for the year were 256, being 64 more than last year.

The dismissals bear a proportion to the admissions which cannot be considered otherwise than as satisfactory. As usual, the largest number of cases occurred in acute mania, amounting to 85, or 68 per cent. of the whole number cured, being 13 per cent. greater than the proportion of the preceding year. There were 31 cures in cases of monomania and melancholia, and 7 in cases of dementia.

The Table showing the previous Duration of Insanity in those Cured, illustrates, as formerly, the importance of dealing with the malady in its early stages. Of the 124 cases—

88 were Cured in less than.....	Six Months.
4 were Cured in less than.....	One Year.
1 was Cured in less than.....	Two Years.
2 were Cured in less than.....	Five Years.

No fewer than 67 of the cures were effected within one month from the admission of the Patients.

The length of residence in the Asylum of those cured was, in—

92 Cases.....	under Six Months
21 Cases.....	under Twelve Months.
6 Cases.....	under Two Years.
5 Cases.....	from Three to Six Years.

Of the 124 cases, 92 cures were effected in Patients betwixt the ages of 25 and 50. Of the total cures, 26 cases were the results of intemperance, 8 of predisposition, and 52 were of unknown origin.

DEATHS.—The number of Deaths during the year was 60, being 19 more than in 1865.

In 22 Cases the form of Insanity was Mania.

In 20 Cases the form of Insanity was Monomania or Melancholia.

In 18 Cases the form of Insanity was Dementia.

Of the 60 deaths, 7 occurred under 25 years of age; 32 under 50 years of age; 16 under 65 years of age; 1 at 70; 1 at 75; 2 at 80; and 1 at 85. Of the number, 28 had been in the Asylum under 10 months; 20 under 5 years; 8 under 12 years; and 4 under 21 years.

32 Patients, 23 Males and 9 Females, died from Diseases of the Nervous system, and their consequences.

19 Patients, 7 Males and 12 Females, died from Diseases of the Chest.

4 Patients, 2 Males and 2 Females, died from Diseases of the Abdomen and Urinary Organs.

2 Female Patients died from Strumous Abscesses.

1 Female Patient, nearly 80 years of age, died from the Decay of Nature; she had been confined in Asylums for 41 years.

1 Female Patient died from an extensive Burn. She had wilfully set fire to herself, and thus committed suicide; and

1 Male Patient died from Loss of Blood, the consequence of a self-inflicted suicidal wound.

—
Total, 60.

The days of many of these Patients were numbered before they were admitted; in fact, several of them were in a moribund state when received, and one of them died on the day following that of his admission. In several cases the insanity was complicated with epilepsy and palsy, giving not the slightest hope of recovery, but, on the contrary, of a fatal termination. It is remarkable that 10 male Patients died from general paralysis in the June quarter. Their period of existence was limited to months after the first symptoms had developed themselves.

Permission to inspect the bodies of the dead is not always given; but where allowed, the examinations, *post mortem*, were always satisfactory. Extensive disease of the brain and its membranes was observed in those ex-

amined, while the lungs and other organs were found to be quite disorganised also. In two males, the heart was found to be much enlarged, and the valves diseased; the hearts weighing respectively, 1 lb. 14 oz. and 1 lb. 9 oz.

TREATMENT.—The experience of one year resembles that of another. In the Medical department, for a considerable period, the bromide of potassium has been extensively tried in epileptic, wake-rife, and other cases, and often in the manner recommended by Dr. BROWN SEQUARD. The Tables, accurately prepared by Doctors HAY and BLAIR, show the numbers of the Patients to whom this drug was given, with the exception of 3 which should be added to the females; but it must be premised that the epileptic cases admitted into this Asylum are generally of old standing. It will be observed that there are always many more epileptic males than females confined here. As a curative agent the bromide has failed in our hands; and in only a few Patients were there any perceptible alleviation of the fits themselves. In many cases, however, it soothed the nervous system, relieved restlessness, allayed excitement, and procured sleep—negatively no bad effects followed from its administration.

The beneficial effects of labour, reading, amusements, and recreation have been, as before, very great. These have done much good to the uncured as well as the cured. Many cases might be given to exemplify this; but as these would only be somewhat like a repetition of what is stated in former Reports, it is not deemed necessary to insert them and others bearing on the state of the Patients here.

The games, concerts, and dances have been more

numerous this year, and much enjoyed by the Patients. Many professional ladies and gentlemen volunteered their services gratuitously; amateurs did the same—coming out in all kinds of weather. It would be invidious to name any one here; and I would beg all those parties to accept my best thanks for their great kindness to the Patients. It is most gratifying to behold the *very lowest* Patients, in the social grade, mixing in the dance, or otherwise, with ladies and gentlemen of the highest position in the city, who have come out to observe for themselves, and entertain the invalids.

It is remarkable that fewer male Patients require to be nourished by artificial means, by the stomach-pump for example, than female Patients. In a very few cases one operation was sufficient.

One gentleman refused all sustenance for three and a-half months; he never spoke all this time, and was fed by means of the stomach-pump three times daily, the tube being introduced by the mouth. He did not seem to care for or feel the operation. On the tube, however, being introduced by the nose, an impression was made, and he took his food perfectly well afterwards. He also began to speak; and, shortly afterwards, became so well that he was able to be removed.

In cases of attempts at suicide by starvation, the stomach-pump is invaluable.

Of the female Patients admitted during the year, thirty refused all kinds of nourishment, and, in consequence, it was found necessary to feed them all by means of the stomach-tube. Six others were Patients belonging to the Ladies' Division of the West House; four were private Patients in the East House; and twenty were

paupers. Two were cases of puerperal mania, in extremely feeble health; these both recovered, and were dismissed well after a short residence in the Asylum. Twenty-two of the cases admitted laboured under mania, three under monomania, five under melancholia, and eight were very suicidal; one of the latter, before admission, had swallowed a number of needles and pins, &c., and another had, shortly before being brought to the Asylum, been rescued from a watery grave in the Canal. The greater number of these cases of acute mania could not give any reason for not taking food. A number abstained for the avowed purpose of destroying themselves; and three with such determination, that it was found to be impossible to feed them by the mouth-tube; they were therefore nourished by means of the nose-tube successfully. Some who wished to destroy themselves by starvation were at the same time afraid of being poisoned. A number fancied that they laboured under bodily disease, and were unable to eat or to swallow; for example, one declared that she had laboured under cancer for eight years, and another that her body was filled with black soap. In one quarter of the year, in the Female Divisions, the operation was performed 124 times. Many of the Patients, from various causes, required an extraordinary amount of attention, both by night and by day, and several of the Paupers had each an attendant for him and herself exclusively.

GENERAL HEALTH.—On the whole, the general health of the Inmates has been good, notwithstanding the state of the atmosphere this cholera year, and the crowded condition of the Asylum. It is rare to find a case of diarrhœa

in the Male Division of the East House. There were several in the Female, and as a consequence of other diseases; but all yielded readily to the prescribed treatment. The West House, from the Patients being of the higher classes, and less crowded, is always very healthy. Deaths, especially in the Female Division of the West House, are rare as compared with the East House where the less rich and poorer Patients are confined. The average daily number of Patients confined to bed from bodily diseases, caprice, &c. was—15 males and 17 females—32 in all. And 4 male night attendants, and 3 female night nurses (exclusive of extra night attendants), were constantly employed in waiting on the Patients during the night.

MEDICAL STUDENTS.—As in former years, a few Medical Students have visited the Asylum, but none came forward this year to witness the practice. In 1865–6, a Military Staff Surgeon attended. Since 1858, twenty-six Medical Students attended, for the period prescribed for them, and according to the statement as published in the journals.

My respectful acknowledgments are due to the Directors for the ready co-operation and valuable counsel with which at all times they have been pleased to favour me.

ALEXANDER MACKINTOSH, M.D.

Physician-Superintendent.

GLASGOW ROYAL ASYLUM,
GARTNAVEL, 31st December, 1866.

	25		24		38		32		23		24		22		21		29		30		26		34				

From the above Table it will be seen that the total number of Epileptic Seizures occurring in the Female Divisions of the Asylum during the year was 338. Of these 113 occurred during the day, and 225 at night. The greatest number occurred in March (38), and the smallest number in August (21). * In the case of Patient No. 7, the seizures were so frequent and of so short duration, that it is impossible to number them; these attacks are also periodic; and she is for 2, 3, or even 6 months or more entirely free from them. Patients 14 and 15 belong to the Ladies' Division of the West House; all the others to the Female Division of the East House.

	176		254		237		262		227		370		235		257		408		318		359		269				

The above Table shows that the total number of Epileptic Seizures taken note of during the year was 3,372. Of these 2,475 occurred during the day, and 897 during the night. The largest number occurred in September (408), and the smallest number in January (176). The greatest number in any one Patient throughout the year was 1,170, and the highest in one month was 133. In a few Patients as many as 20 seizures were observed in one day.

The Underclothing and Bedding, &c. of the Male Division of West House, and the Male and Female Divisions of East House, is all repaired by the East House Patients.

PATIENTS ARE ADMITTED

ON THE FOLLOWING TERMS.

EAST HOUSE.

BOARD OF PATIENTS FROM PRIVILEGED PARISHES, 9/11 PER WEEK.

FIRST RATES FOR OTHER PARISH PATIENTS, 11/2 & 12/2 "

 " FOR PRIVATE PATIENTS, 11/, 11/6, & 12/6 "

SECOND RATE FOR " 15/ "

WEST HOUSE.

THIRD RATE OF BOARD, . . . £1 1 0 PER WEEK.

FOURTH " " . . . 1 11 6 "

FIFTH " " . . . 2 2 0 "

SIXTH " " . . . 3 3 0 "

SEVENTH " " . . . 4 4 0 "

EIGHTH " " . . . 6 6 0 "

A Fee, on admission, is paid to the Institution by each Patient at the Second rate of Board and upwards. Should the Patient remain a year or longer, the Fee is charged on the expiry of the year, and that of each succeeding year of the Patient's residence in the Asylum.

THE TWO FOLLOWING DOCUMENTS

ARE IN EVERY CASE INDISPENSABLE.

I. Order from the Sheriff, in terms of the Statute 20 and 21 Vic. cap. 71, which will be granted on the presentation of Certificates of Lunacy, by two Medical Practitioners, together with a Petition and Statement by a Relative or Guardian of the Patient. Patients can also be admitted on a Certificate of Emergency, but for three days only.

II. Written Obligation for Payment of Board, as well as for due observance of the Rules of the Institution, from one or two responsible persons resident in Glasgow; or, in the case of Parish Paupers, from an Inspector of Poor.

Forms of these documents will be furnished by the Physician, Dr. MACKINTOSH, Royal Lunatic Asylum, Gartnavel; or by the Secretary and Treasurer, MOSES PROVAN, Esq., C. A., 110 West George-Street, Glasgow.

GENERAL REGULATIONS.

1. The first Quarter's Board shall be paid previous to admission, and thereafter at the beginning of the regular quarterly terms of 1st January, 1st April, 1st July, and 1st October.

2. No part of the Board, *for the first Quarter*, of Patients at and above the rate of Fifteen Shillings per week, shall be returned, except in the event of death before the expiry of that period, in which case the Directors may allow a return of such proportion as they consider reasonable.

3. When any Patient is dismissed or dies during the currency of *any succeeding Quarter*, the Weekly Committee shall have power to determine, on an application being made to them for that purpose, whether any or what portion of the Board advanced shall be refunded.

4. Patients have no claim for remuneration for their labour.

5. Every Patient must be provided with proper Apparel. An accurate List of every Article brought with the Patient must, on admission, be delivered to the Steward or principal Attendant, or to the Superintendent of Ladies and Matron, according to the House in which the Patient is placed; and the Name must be fully marked on each article. If any necessary part of Dress should not be duly supplied, after eight days' intimation has been given that it is wanted, it will be furnished by the House, and the cost of it charged against the Patient.

On applying to the Physician, the Patient will be carefully and expeditiously conveyed to the Asylum, the necessary expenses being paid to the Steward by the Applicant.

Patients in the WEST HOUSE may be visited every *lawful day* between 10 and 12 o'clock; those in the EAST HOUSE, who are not Paupers, on Mondays, between the same Hours; and Patients who are Paupers, on Saturdays, also from 10 till 12 o'clock. Only those who are duly authorised can be permitted to visit Patients.

LIST OF PARISHES,

Which, by Contributing the requisite Sum, in proportion to their Population, have acquired the privilege of recommending their Insane Poor for admission into the Asylum, on the same terms with those of the City of Glasgow.
